

Rodrigo Aranda

Full-Stack Developer

Paraná, Argentina | rodrigoaranda00@gmail.com | +54 343 525-9738 | Portfolio: rodrigoaranda.dev | github.com/RodrigoAranda00

PROFESSIONAL SUMMARY

Full-stack developer based in Argentina with 4 years of professional experience building and maintaining end-to-end web applications with Django/Python and React/Next.js. I've worked with international engineering teams across front-end development, back-end performance, accessibility, and product features. My background as an English teacher has also strengthened my communication and technical documentation skills. I'm currently deepening cloud (AWS) and AI engineering skills, while also learning Mandarin to connect with even more people.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frontend: HTML5, CSS3, React, Next.js, Redux, Tailwind CSS, shadcn/ui, Sass, Bootstrap

Backend: Django, Django REST Framework (DRF), REST APIs

Databases: MySQL, PostgreSQL

Tools & Practices: Git, Docker, WCAG 2.1 AA accessibility, JAWS, NVDA, Tesseract OCR

PROFESSIONAL EXPERIENCE

Full-Stack Developer - PSh

International Client: Renaissance | 8-10 person engineering team | Feb 2025 - Present

- Modernized legacy React components and resolved a large backlog of bugs on an EdTech platform used internationally; built new front-end components from Figma designs, including a full redesign of the login page.
- Improved key user flows to meet WCAG 2.1 AA accessibility requirements, testing with screen readers such as JAWS and NVDA alongside manual accessibility audits.
- Optimized database queries by fixing N+1 patterns, adding indexing, slimming payloads, and introducing pagination, speeding up lesson listings across the site.
- Helped build two new game modes for the platform, working on the front-end implementation and state management with Redux.

Stack: Django, React, TypeScript, Redux, Sass, MySQL

Full-Stack Developer (Junior) - Andine Soft

Early-stage startup | 2-3 person engineering team | Mar 2023 - Jan 2025

- Built and maintained Django back-end services and REST APIs for the platform, designing database models and improving query performance for core product features.
- Independently designed, built and optimized an OCR (Optical Character Recognition) engine, a core feature of the product, using JavaScript, Python, and Tesseract to automatically extract receipt data regardless of layout.
- Configured and integrated OAuth 2.0/OIDC authentication and authorization with access and refresh token handling.

Stack: Django, Python, MySQL, JavaScript

PROJECTS

Trolley - github.com/RodrigoAranda00/trolley

Full-stack Trello-style task board with drag-and-drop across boards/columns, priority and due-date tracking, and Clerk authentication. **Stack:** Next.js, TypeScript, Tailwind CSS, Supabase, Prisma, Clerk

Done-ish - github.com/RodrigoAranda00/doneish

Minimalist mobile task manager for staying on top of chores and errands; quick-add capture, drag-to-reorder lists, fully local storage (no accounts). **Stack:** React Native, Expo, TypeScript, Zod

EDUCATION

English Language Teacher - Universidad Autónoma de Entre Ríos (2018 - 2024)

CERTIFICATIONS

AWS Certified Solutions Architect - Associate - **In progress (target 2026)**

10+ Courses - Platzi, Udemy, LinkedIn Learning

LANGUAGES

Spanish: Native

English: Fluent
